Client **Fonterra**

Location **Australia**

Contract **Design, Fabricate & Supply**
Access Beam for Powder
Drier Inspections &
Maintenance

Project Scope

NZIA was requested to design, fabricate and supply a spreader beam which enabled NZIA to use rope access to inspect and carry out maintenance on Fonterra's two large powder driers.

For the past 7 years NZIA had been shipping our own beam over and back each year for the inspections, but our client decided it was more cost effective in the long run to purchase their own beam and have it stored on site for when we go over every year.

We use this design process to gain access to any round cylinder/silo or vessel of basically any diameter ranging from 3m to 22m.
